

# USER INTERFACE SPECIFICATION DOCUMENT

## Introduction

This document describes the User Interface for the “New User” part of database.

## Structure

The structure is very simple as you can see in the following diagram. After clicking “New User” part you can fill the information.

You can see the interface design below.

The screenshot displays a user management interface. At the top left, there is a '+ New User' button and a 'Hide Disabled User' checkbox which is checked. At the top right is a 'Save User' button. On the left, a table lists existing users:

ID	User Name	Email	Enabled
1	AdminUser	admin@piworks.net	true
2	Test User	testuser@piworks.net	true

On the right, the 'New User' form includes input fields for Username, Display Name, Phone, and Email. Below these is a 'User Roles' dropdown menu currently showing 'Select user roles...'. An 'Enabled' checkbox is located below the roles menu. The dropdown menu is open, showing three options: 'Guest' (highlighted in blue), 'Admin', and 'SuperAdmin'.

After giving the information which is explained with the diagram, you can click “Save User” part. Now we have the data that we need. By clicking “Hide Disabled User” part you can access up-to-date lists of users. If you need old records, you can view the relevant information in this table.

In our database the ID number will come automatically. You can see the User Name, Email and enabled information on the table.

### System Requirments

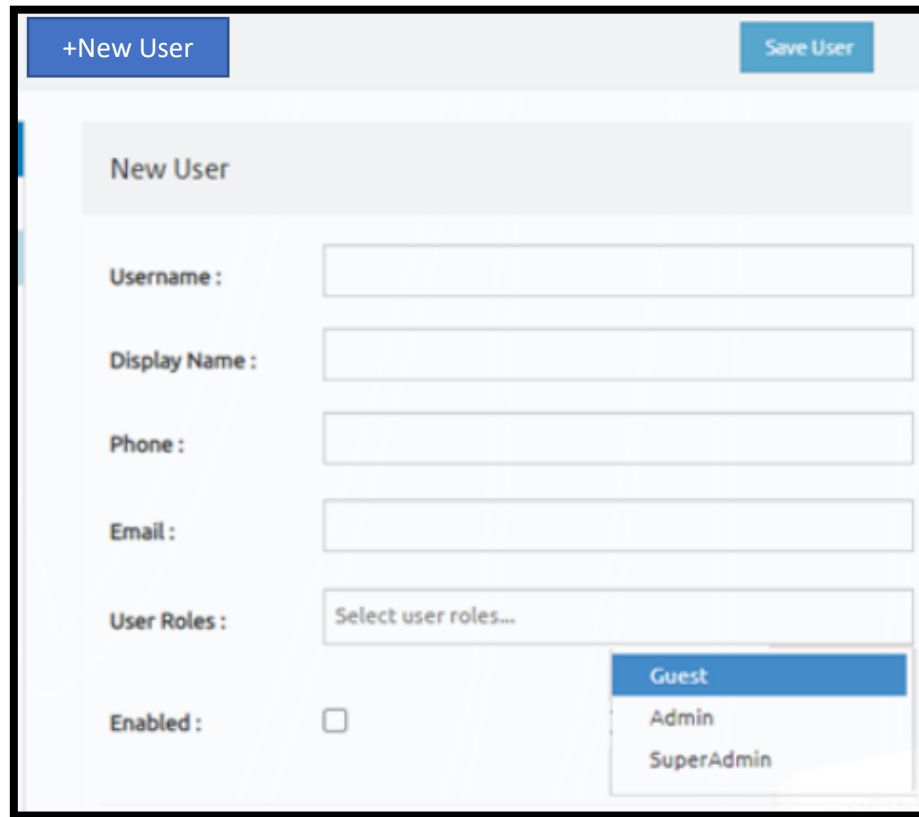

On our database table we need requirments. We want to see the all information that we typed. We want to see

- Display Name,
- Phone Number,
- Email Addresses and
- User Roles.

It would also be very useful to have an area where we can **delete user** information.

## The Behavior of the Page

At the beginning, there is no need to see the database. Adding “ New User” part is enough. And “+ New User” button can be moved to the upper left corner of “New User” part.

The screenshot shows a web form titled "New User". At the top left is a blue button labeled "+New User", and at the top right is a blue button labeled "Save User". The form fields are as follows:

- Username :
- Display Name :
- Phone :
- Email :
- User Roles :  (A dropdown menu is open showing "Guest", "Admin", and "SuperAdmin".)
- Enabled : ☐

After saving the user information we can reach the database.

ID	User Name	Email	Enabled
1	AdminUser	admin@piworks.net	true
2	Test User	testuser@piworks.net	true
